

Stable Micro Systems

Stable Micro Systems Quality Policy

The policy of our company is to provide an outstanding service, thereby achieving efficiency and long-term profitability.

Our scope of certification is: '**Design, development, supply and servicing of electro-mechanical test equipment**'.

All requirements of ISO 9001:2015 are applicable.

We will continually improve our organisation, our Quality Management System (QMS) and products through on-going development and objectives and targets and we will carefully monitor progress to ensure improvement is realised and maintained.

Improvement is driven by:

- Co-operation with customers, partners and preferred suppliers
- Implementation of best practice
- Embracing technology
- Encouraging personal development
- Instigating system improvements
- Providing products, which are fit-for-purpose
- Conforming to all relevant standards and legal requirements
- Meeting customer requirements and expectations

We have therefore adopted and implemented a QMS, which complies with international standard ISO 9001:2015 and had this externally assessed and registered by a UKAS-Accredited Certification Body.

Awareness of our policy and the relevant requirements of QMS, amongst all employees and others who work for us is crucial. To this end we have a programme of training and awareness, which ensures staff competence and awareness is maintained, and a process for ensuring that suppliers are fully aware of our required standards.

Signed:

Mark Proto
Managing Director
